1. We did it again! Three more city plans were printed without [REDACTED] reference line - UL'YANOVSK, LITVINERAD, and TILISI. What's to say?

2. The concept of refining the grid system for more accurate plotting is under study. We agree with the principle and will pursue the idea. Our present thoughts lead us to feel that a 100 meter grid with interpolation to 10 meter is about as detailed as we should go. The numbering system is still under discussion but leaning toward the HV(Horizontal-Vertical) plan used by AF on their 1:25,000 mosaics: Example H0855V1237. This plan would always orientate in the lower left corner and would not tie into any "true" grid system. We will keep you advised.

3. The [REDACTED] plans that we print should be arriving at this time only through St/I. Our Map Library is aware of the fact that they should be sending to you only those plans we have produced. Hope this is straightened out.

4. Your proposed contact with geographic persons and the tours of the cartographic installations are to be encouraged. I'm happy to hear that you are developing a fruitful contact with Mr. Lewis. Please convey my regards.
